

Return of Results

WHEN RETURNING RESULTS:

- Explain recency result does not change healthcare management
- Emphasize referrals and linkage to HTS services
- Report any adverse events, such as IPV, per routine procedures
- Encourage partner testing irrespective of recency status

PARTNER NOTIFICATION

- Describe options for notifying partner: **client referral, provider referral, contact referral**
- Discuss how the client can tell the partner to get tested.

Individual-level result returned

HOW TO RETURN

1

Enter viral load results into the electronic data record.

3

Use **Return of Recency Results Post-test Counseling Guide** to disclose client's recency results.

2

Prepare client for result:

- Ask what he/she will do in case of recent diagnosis
- Any questions about recency?

4

Offer **Understanding HIV and Recent HIV Infection Handout** to review at home
